Updates on Most Recent Local Activity: Week 07 (February 10 – February 16)

- During Week 07, ILI symptoms made up 2.38% of Marion County ED visits, which is above the 2.0% baseline for flu season.
- There have been less than 5 influenza-associated deaths for Marion County residents this flu season.
- In Marion County hospitals' ED population, ILI was most common in the 5-17 age group. Among ED visits by 5-17 year olds 6.47% was for ILI. ILI among ED visits by 0-4 year olds was next highest, at 5.31%.

Percent of ILI related ED Visits

Local (Week 06)

- The percentage of ILI related ED visits was 2.19%.
- Children age 0-4 had the highest age-specific percent ILI (5.79%).

Indiana (Week 06)

<https://www.in.gov/isdh/files/Weekly%20Influenza%20Report-Week%206-2018-2019.pdf>

- Indiana is experiencing widespread and high ILI activity. For Week 06, ISDH reports 3.87% ILI at sentinel provider sites and 2.31% ILI ED visits. This is an increase for sentinel providers (3.75% Week 05) and a decrease for ED visits (2.41% Week 05).
- There have been thirty-one influenza-associated deaths in Indiana for the 2018/2019 flu season.
- Week 06 results for samples tested at the state lab: 18 specimen tested positive for 2009 A/H1N1pdm and 9 specimen tested positive for Influenza A/H3 seasonal virus.

National (Week 06)

<https://www.cdc.gov/flu/weekly/index.htm>

- During Week 06, influenza activity increased in the United States, and the majority states were reporting high and widespread influenza activity. In addition, during Week 06, 4.8% of outpatient visits reported through the U.S. Outpatient Influenza-like Illness Surveillance Network (ILINet) were due to ILI. This is higher than Week 05 (4.3%).
- Thirty-four influenza-associated pediatric deaths have been reported to CDC for the 2018/2019 flu season.
- The percent of respiratory specimens testing positive for influenza in clinical laboratories increased. During Week 06, the numbers of positive specimens for influenza A (97.8%) was higher than influenza B (2.2%).

Note: ILI (Influenza-Like Illness) visit means that the patient reported fever with cough or sore throat, or used the word "flu" or "influenza" to describe either their symptoms or their reason for the ED (Emergency Department) visit.
